Introduction

The following details the compatibility between OpenEdge™ and Aurea Messenger (formerly Sonic) product releases, documenting what platforms the OpenEdge Adapters for Sonic (MQ and ESB) can be installed and run on.

- The OpenEdge Adapter for SonicMQ and the OpenEdge Adapter for Sonic ESB may be installed and used on any platform that is supported by both OpenEdge and by SonicMQ/ESB, as indicated in the following tables and links.
- If either OpenEdge or SonicMQ/ESB is NOT supported on a platform, the OpenEdge Adapter for SonicMQ/ESB cannot be installed and is NOT supported on that platform.

In addition, compatibility information is provided between the versions of:

- OpenEdge Clients and the OpenEdge Adapters for Sonic (MQ and ESB)
- OpenEdge Adapters for Sonic (MQ and ESB) and the SonicMQ Clients
- SonicMQ Clients and the SonicMQ Brokers

This document does NOT address unsupported legacy OpenEdge releases or unannounced future OpenEdge product release plans.

- Any combination that is not listed in the tables is not supported.

Note: As of November 2013, Progress Software divested the Sonic product line to Aurea Software. Progress retains a reseller agreement with Aurea for Sonic to the Independent Software Vendor (ISV) channel. Sales to any other Progress channel (e.g. Direct End Users) is handled by Aurea Software.

The information contained in this document is updated on a regular basis and is subject to change without notice. The information provided in this section summarizes the supported platform data from the OpenEdge and Aurea Messenger (formerly Sonic) product lines. Please refer to the individual product documentation for definitive platform support information.
